# USING THE OPTIONAL EQUIPMENT MANUAL

**⚠ WARNING**

- **This manual is to be used only for identification and ordering service parts. Be sure to read and use the maintenance and service manual before attempting any vehicle repairs.**

Use this manual to identify and order accessories for Club Car vehicles. The Optional Equipment Manual is current at the time of publication.

This manual includes two reference tools: a Table of Contents and an Index. The Table of Contents lists section numbers and titles, and under them, individual page titles and page numbers included in that section (Fig. 1). The last section shows tools that can be used on all Club Car products.

The index (Fig. 2) lists specific parts and assemblies. Items are listed by both part number (numerical listings) and name (alphabetical listings) with the page numbers in italic text. Items are listed by part number in the numerical section and by name in the alphabetical section.

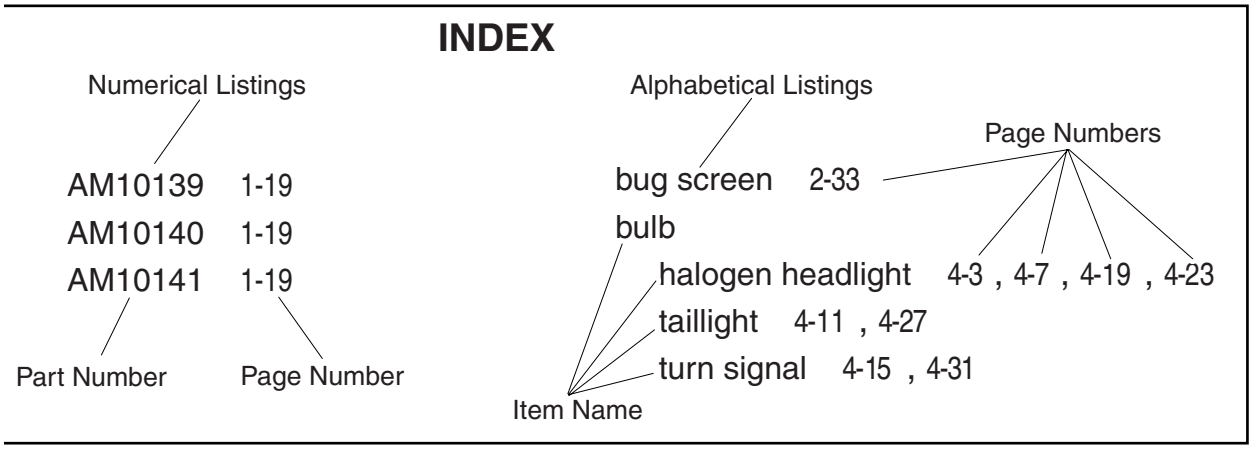

Fig. 2

There is a two-page spread for each page title listed in the Table of Contents. The left-hand page (Fig. 3) contains either an illustration or a photograph showing kits and parts in their relative positions. Each part is labeled with a number balloon.

The right-hand page is the parts list page. The item numbers listed on the parts list page correspond to the balloon numbers in the illustration. The parts list page also shows part numbers, part descriptions, quantity used, and applicable vehicles.

Some item descriptions are indented. This indention corresponds to a parts assembly level. A part that is indented to level 2 is either a component of the level 1 part (assembly) that it is listed under, or it is a variation of the item listed at level 1 . A level 3 part is a component of the level 2 part that it is listed under, and a level 4 part is a component of the level 3 part (Fig. 4).
